

Enabling a fast-pace competitive *twin transition* of the construction sector through *flexible product standardization pathways*

Join AFCOS in a fully interactive event uniting standardization bodies, policymakers, researchers, and industry leaders to drive the standardization of low-carbon construction products and advance Europe's green and digital transition, ensuring a fair and competitive sustainable future.

Lombardy Region Delegation in Brussels, 13.06.2025

Why Attend?

Your **path to impact:**
Shaping the Future of Sustainable Construction with Innovation and Standards.

Shape the future of construction standards:

Dive into the AFCOS **Whitepaper** and contribute to creating flexible, actionable standardization pathways for the construction sector, enabling a fast-paced competitive twin transition

Don't miss this chance to actively contribute to Europe's **energy** and **sustainability goals!**

Interactive and collaborative engagement!

Not only will you listen to presentations, but you'll also be actively involved in live activities to explore concrete solutions for the sustainable construction sector.

Grow your network & influence!

Connect with key experts—policymakers, industry leaders, and innovators—building meaningful collaborations to push forward the green revolution in construction.
